Hello,

AND WELCOME TO THE FOURTH EDITION OF THIS FANTASTIC ASTRAL MANIFESTATION MANUAL!

The idea for this diary started in 2018, when I was studying at the Faculty of Astrological Studies in Oxford, England. Every class I attended surprised me with so much new and powerful information, but I didn't have a guide to check the pace of the planets every month, every year. No such guide existed at the time. The following year, I independently published the first edition of *The Astrological Diary* in Brazil. And it was a much greater success than I expected.

This diary is for anyone seeking self-knowledge, self-care, and wanting to learn how to manage their internal tools and become their own gurus.

With every edition I reinvent myself and present to you a little more of what I have studied. This year, 2024, is beyond special. The diary is increasingly becoming like an astrological and natural magick manual so that you can, with your own energy, transform your life according to the music of the Universe.

Tarot, Kabbalah, runes, rituals and sacred altars – they all connect us with our primordial essence, and take us back to a time when nature was our compass, when we could read more clearly the messages from the stars.

I hope I can help you reveal the light within you, so that you can direct your energy and take control of your life, using your inner power to your advantage, to become the creator of your own destiny.

We are all cosmic dust, beloveds.
Let's go together on this journey here on Earth.

A handwritten signature in black ink that reads "Ana Leo". The script is fluid and cursive, with a large, stylized initial 'A'.

WHAT IS THE NEW MOON?

Every month, the Sun and Moon meet in the sky. This meeting is undoubtedly the most powerful moment in the entire lunar cycle, as it contains the perfect energy to start a new chapter.

During the New Moon, the Sun and Moon are in the same mathematical degree in the Zodiac. Together they join forces to help us work for our intentions. It is this unity that creates a powerful vibration in the Universe and within each one of us. Our strength and emotion are together, as if an energetic and cosmic portal has been opened, and we are invited to sow a seed of what we need to manifest in our lives. So the New Moon is the perfect time to take a first step or start a project, because the energy of the Moon is so strong that we can direct it to make great energetic leaps in our lives.

At the Full Moon we observe our entire journey in the last six months. It is the culmination of the events that emerged at the New Moon. It is when the Sun is on the opposite side of the Moon, illuminating her conquests and opposing her energy. Use the two weeks after New Moon to walk toward your goal and observe the first steps of your intentions. Work hand in hand with these cycles, so that in six months, when the Full Moon finally happens in that same sign, you will have manifested a new reality in your life.

Besides giving us the opportunity to start something, the New Moon also allows us an opening to balance our entire internal being: our soul, mind and spirit. Through the union of the Sun and the Moon, every month we have a new opportunity to create balance in our internal and external energies and, consequently, in our lives.

HOW TO MAKE MOST OF THIS MOMENT?

When the Sun and Moon are balanced, so are we. Each month, this diary will show you the ideal "theme" to work on, both in terms of your feelings and your actions.

The house on the astral chart, where the New Moon takes place, gives us clues, showing us the area of our life where we must put all our intentions in motion.

The New Moon pages in this diary were created to guide you in the use of these energies and to help you identify the areas to be worked on. In some months you will be more motivated to act; in others, you will be helped to vibrate what you want to feel.

Through the lens of the Zodiac, we are able to identify the right time to take action to transform our reality. The balance of these two vital energies is the key. When the two celestial bodies – the two most important luminaries for our daily life – come together in the sky to balance their energies, we must balance ours too.

HOW TO MANIFEST?

RULES TO SHOW YOUR INTENTIONS TO THE UNIVERSE

The exact moment of the New Moon possesses the greatest energetic force, so it is a time when you can plant your intentions for the next cycle.

The 12 hours before this event are charged with this energy and must be used, both for introspection and for reflection. Six months separate a New Moon from a Full Moon, in the same sign.

This is the period when we see our desire grow. Following its development, it is time to take care of it and give the necessary attention so that it manifests itself. Remember that your desire is like a seed that needs to be nourished every day, so that it grows and bears flowers and fruits. Just creating the list and not taking any action to make it a reality will not lift it off the paper.

Put at least five intentions on your list, always pointing out the necessary action for it to become reality. For example: I intend to lose 5kg (11lb) – I will start walking three times a week. I intend to get a job – I will rewrite my resumé and send it to a specific company I want to work for.

Make sure that you are asking a request from your soul, not your ego. The soul's desires require patience and dedication, and bring you long-term satisfaction. The ego's desires are superficial and only benefit you; your satisfaction is immediate and does not last for long.

Remember that you must feel as if you are already fulfilling all your wishes, so when you write them, imagine yourself as if they were already a reality. How would you feel? What would you say to other people? How would you describe it to the person who most wants to see your success? The greater the detail in your imagination, the better.

WHICH TIME ZONE IS CONSIDERED?

THIS DIARY CAN BE USED IN ALL COUNTRIES WITH THE FOLLOWING CONSIDERATIONS

All the time zones are described on the New Moon pages.

PST – Pacific Standard Time or PDT – Pacific Daylight Time

CST – Central Standard Time or CDT – Central Daylight Time

EST – Eastern Standard Time or EDT – Eastern Daylight Time

GMT – Greenwich Mean Time or IST/BST – Irish/British Summer Time

CET – Central European Time or CEST – Central European Summer Time

All the information in this diary has the intention of alerting you before the aspect reaches its apex. As they are eight hours ahead of the Pacific, European countries should consider the day starting at 8:00am. So if the exact aspect perfection occurs before then, the advice will be posted one day before. Most US readers should consider the day to start between 12:00am and 3:00pm as usual. An aspect is always strongest as it builds, and then gradually weakens after it reaches its perfection (same degree and minute). Australian and Asian residents can prepare one day earlier. No matter where you are, with this diary, you will always be ready for the best energy to come!
